

## 1. Clean-Up and Remediation @ Cawthorne Channel 1 Flow Station

The oil spill incident occurred on 22/09/2008 with incident number 2008\_00226. Clean-up and Remediation was carried out by Giolvee Global Resources Ltd from 22/07/2013 to 20/08/2013 for the client, SPDC Nigeria. Oil Spill Eater II was used as the treatment agent to aid in the natural attenuation process. The site was certified by regulators and closed out by the client.
